

The Humber Science Festival celebrates science in its broadest sense, including maths, medicine, engineering, technology, innovation and the history of science.

We'd love for you to join us!

We will be celebrating the most exciting, cutting edge developments in science and technology in a variety of ways - including seminars, drop-in activities, debating and creative content.

The festival will focus on engaging families, primary school children and youth groups. This year we expect to distribute over **3000 FREE tickets** to shows, workshops and a host of hands-on activities.

We plan to:

- Deliver a programme of events and activities in a variety of venues and sites across the City of Hull. The main venue for the Humber Sci Fest will be within the University of Hull campus.
- Attract a diverse audience, including people who would not normally engage with science events.
- Explore the overlap of science, arts, and culture.
- Showcase the wide range of science, technology and innovation taking place in the region, ensuring this is audience-focussed whilst retaining scientific credibility and rigour.
- Inspire, enthuse, entertain, and inform audiences and support a life-long interest in science
- Widen participation in STEM education via engagement with hard-to-reach audiences
- Showcase local STEM careers as a viable option for school-age children in the region
- Attract regional and national media coverage

The project is focused primarily on the Humber region, though attendees will not be drawn exclusively from this area. The region has a population of approx. 950,000 people. Major conurbations include Hull, Scunthorpe, Grimsby, Bridlington and Goole. We invite participation from a variety of sources, including individuals, researchers, industry professionals, artists, writers, organisations, non-profits, and academic institutions.

So, whether you're a business or individual, scientist or artist - please join us! Come along and support this fantastic annual showcase of our region's best and most exciting science innovations!

Showcase your exciting projects to the widest, most diverse and receptive audience at the region's largest

FREE SCIENCE EVENT

Join us as a sponsor!

It's the perfect opportunity to:

Introduce your product or service

Boost awareness and visibility of local science initiatives

Outreach - maintaining links with communities across Hull and the Humber region
